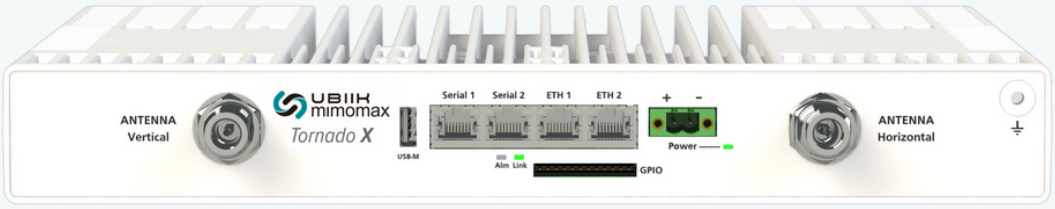
UBIIK MIMOMAX TORNADO X

900MHz Radio Spec Sheet



Tornado X is a high Tx power addition to our full duplex, MIMO product range. Offering a Tx power which remains stable across all modulations, full compatibility with the Tornado radio allows for a mix of radios in the network to suit terrain or meet network requirements.

Software flexible, ultra-spectrally efficient and offering extremely low latency to provide near real-time communications and visibility across critical infrastructure.

Tornado X is ideally suited as:

- a base radio for coverage limited multipoint systems or networks where traffic is uplink predominant
- a point-to-point linking radio for longer links and obstructed paths.

Available in 900MHz and in 12.5kHz, 25kHz, 50kHz, 75kHz, 100kHz, 150kHz or 200kHz channel sizes.
